

# Help keep our mob HPV free

**The free HPV  
vaccination is available  
for 12 and 13 year  
old boys and girls,  
but more than a  
quarter of our children  
are missing out.**

**You can help:**

- Talk to your family about the importance of HPV vaccination.
- Encourage your children to receive both of their vaccination doses at school or at your local Aboriginal Health Service or doctor.
